Re: Federal Energy Regulatory Commission (Commission) Project No. 1417, License Article No. 421, Revised Draft Management Plan for Least Tern and Piping Plover Nesting on the Shore of Lake McConaughy

Dear Mr. Maher:

The U.S. Fish and Wildlife Service (Service) has reviewed the referenced item that was included as an attachment to a March 20, 2001, E-mail message. As a result of that review, the Service concurs with the revisions that have been made to the draft Management Plan. The implementation of the measures described in the revised draft Management Plan along the shoreline areas of Lake McConaughy in Keith County, Nebraska should contribute toward the recovery of the federally endangered least tern and threatened piping plover.

The Service appreciates Central Nebraska Public Power and Irrigation District's (Central) cooperation and willingness to pursue improvements to the draft Management Plan which the Commission is currently considering for approval. We also look forward to working with Central and the Nebraska Game and Parks Commission on the future implementation of this plan. Questions regarding this matter may be referred to Ms. Erika Wilson within our office by calling (308)382-6468, extension 25, or at the following E-mail address: erika_wilson@fws.gov.

Sincerely,

Steve Anschutz

Dear Mr. Maher:

Please make reference to recent modifications made to the least tern and piping plover section of the Land and Shoreline Management Plan for Lake McConaughy.

The Nebraska Game and Parks Commission concurs with modifications made to the Plan. We determined that these modifications will adequately protect habitats for the least tern and piping plover at Lake McConaughy.

Please let me know if we can be of further assistance. If you have any questions or concerns, please call me at 402-471-5539.

Sincerely,

Kirk L. Nelson
Assistant Director
